

**Postdoctoral Research Associate on BaBar
University of Texas at Austin**

The experimental high energy physics group at the University of Texas at Austin has an immediate opening for a postdoctoral research associate to work on the BaBar experiment at SLAC. BaBar is currently taking data and will provide unprecedented opportunities to study CP violation and other topics in B meson decays. Our group is most closely associated with the BaBar electromagnetic calorimeter. The successful applicant will be resident at SLAC and will participate in BaBar operation, data-taking, and analysis.

Interested recent Ph.D.'s should contact Prof. Jack Ritchie (ritchie@physics.utexas.edu) for additional information. Applicants should send their CV, and arrange for three letters of recommendation to be sent, to:

Prof. Jack Ritchie
Department of Physics
University of Texas at Austin
